1 Practice EDA

Take a look at the following graphic – first by yourself – and then with your group. Answer the following questions:

1. What do the solid curves represent? What can you tell based on them?

2. What does Figure 1 imply about city vs highway driving? Why might this be?

3. What does Figure 1 imply about the relationship between fuel economy and price?

4. Notice that economy values tend to form horizontal 'stripes' – why is this?

Figure 1: Fuel economy vs price for the UCI autos dataset.
